4. The drawings were received on 06/10/2009. These drawings are accepted.

REASONS FOR ALLOWANCE

5. Claims 1-14 are allowed.
6. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest applying a stimulating signal to a cell membrane where this applied signal conforms to the waveform of an initial portion of the curve C_{GT}

in successive instants or time periods after the signal as been applied to the cell membrane.

7. The closest prior art is Miklavcic et al. (WO 01/815333 A1) discloses an electroporation device that includes a signal generator such as a voltage pulse generator where that signal is supplied to a substrate by means of a pair of electrodes. Miklavcic also includes a measuring, monitoring and calculating means such as a microprocessor with RAM and a measuring means and a calculating means. However, Miklavcic does not disclose applying the stimulating signal to the substrate where the signal conforms to the initial portion of the curve C_{GT} . Also, Dunn et al. (US 6,653,091 B1) discloses an electroporation device that can extract an analyte from a living cell, such as glucose, where the extracted glucose determines the blood glucose level of the patient. The applied prior art fails to teach or fairly suggest, either singly or in combination, applying a stimulating signal to a cell membrane where this applied signal conforms to the waveform of an initial portion of the curve C_{GT} in successive instants or time periods after the signal as been applied to the cell membrane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
